Electricity generation source		Output (GWh)	Output (GWh)	Output (GWh)	Output (GWh)
Coal		652156	721005	652160	652160
Oil		-	30668	-	15080
	Petroleum liquids	11456	-	-	-
	Petroleum coke	3629	-	-	-
Natural gas		1869902	1928755	1869900	1869900
Other fossil gas		10845	-	30470	10850
Notes		"Other Fossil Gas" includes gaseous propane, blast furnace gas, other manufactured and waste gases derived from fossil fuels other than hydrogen. "Other" includes hydrogen, non-biogenic municipal solid waste, batteries, purchased steam, sulfur, tire-derived fuel, and other miscellaneous energy sources. (Ignoring the latter.) 2024.	"Other sources" includes fuel cells and does not include coal, oil, natural gas, nuclear, hydropower, biofuels, waste, wind, solar PV, solar thermal, geothermal. However, there is a chance some oil is covered. Based on documentation, "Other sources" unlikely to be a major fossil fuel contribution. 2024.	"Other Fossil" generation includes generation from oil and petroleum products, as well as manufactured gases and waste. 2024.	Allow petroleum to be oil. "Other gases" includes blast furnace gas and other manufactured and waste gases derived from fossil fuels. "Petroleum" includes distillate fuel oil, residual fuel oil, petroleum coke, jet fuel, kerosene, other petroleum, and waste oil. Includes propane since 2011. 2024.
